RESCHEDULED - Nighttime repairs start again on US-95 Spokane River Bridge

CORRECTION: Work has now been rescheduled to the following week. For the exact start date, drivers should refer to message signs placed on the highway closer to construction or 511.

COEUR d'ALENE—Nighttime repairs will start again on the U.S. Highway 95 bridge over the Spokane River, with work beginning on **Wednesday, Sept. 14**. Drivers heading downtown after 7 p.m. over the next two months should plan for congestion.

Last summer crews sealed the driving surface and began work on the railing. This fall, crews will replace the railing as well expansion joints that allow the structure to expand and contract with the weather.

"Generally drivers should only have to contend with the shoulders being closed, but there will be a few weeks when the contractor is working on the joints that we'll also close a lane," ITD Project Manager Cole Mosman said.

Construction this year will be followed by a larger project in 2023 that will repair the concrete piers and paint the underside of the bridge.
